COOLIDGE RARE PLANT GARDENS, LTD.
PASADENA, CALIFORNIA

Memorandum

This list has much new material, which will be of real interest to your customers and attract new and desirable prospects. Nothing will make a stronger appeal and increase your sales volume than your reputation for having something unusual to offer, in addition to a well rounded-out line of general nursery stock.

PRICES: Very substantial reductions from previous price list:

and in addition,

TERMS: we will allow discounts of 10% for spot cash and 5% 30 days--60 days net; as well as an extra 5% off on orders of a 1000 or more plants of one or more varieties.

The year 1933 should see business started on the up-grade, so this is the time to plan to be ready to take care of an increasing future demand by a careful selection of your lining-out stock for immediate planting. Right now there is said to be an actual shortage in certain lines of fresh first-class nursery stock for landscaping.

Those nurseries who have the fore-sight and energy to keep up the quality, variety and quantity of their stock will emerge from this depression stronger and more permanently established.

We carry only first-class stock and guarantee you entire satisfaction.

1930
Kurume Azaleas

(JAPANESE)

The KURUME AZALEAS were introduced from Japan to the Pacific coast about five years ago by the Coolidge Rare Plant Gardens, where they may be seen blooming in all their myriad colors from January to April. Their charming flowers range from the purest white through the pinks, salmon and orchid shades, to the rich red of the "Cherry Ripe." An increasing number of "plant pilgrims" come to admire them each year---many from long distances---including some well-known artists who have perpetuated their beauty on canvas.

As soil containing alkali or lime is detrimental to their development, we would recommend a fifty per cent mixture of peat or leaf-mold, or a combination of them, both of which create a favorable acid condition. They require a shady or semi-shady location to give the best results, and plenty of water, particularly during the blooming season. They can be planted at any time of the year, and are easily moved, even when in full bloom. The peat and leaf-mold mulch does away with the necessity of cultivation, which, owing to the nearness of the root system to the surface, is not advisable.

When grouped beneath trees or near a pool, the effect is natural and charming. The cut flowers last about two weeks in water, and lend themselves to many uses, such as table decorations, corsages, etc. They also make attractive pot plants for the house or patio.
